a little sincerity is a dangerous thing, and a great deal of it is absolutely fatal ..... Oscar Wilde

Neil & I, ruminating in the Ivory Tower at 36½ Union St, trust you now perceive what heretofore was seen but darkly:

1. Anti-Communists have played the major role in control of the White House since Ike warned of the Military-Industrial Complex .... today that translates to increased defense budget (and arms' sales) To "Keep America Strong" and stupid .... it ignores the nose-on-your-face fact that all the world's a neighborhood, not a battleground .....
2. Anti-Communism was the black Knight who slew the Dragon Peace first in Dallas (JFK), next in Memphis (MLK) and two months and a day later in Los Angeles (RFK) .....

we continue display of two assassinations' truthful solution with a detailed look at the third murder of the 60's .... exposing Coverup is duck soup in Los Angeles ..... before continuing on page 8: note here

$ _____: whatever 6/yr are worth to you ... checks payable to Cutler Designs ... check = receipt & notice of renewal: ----

Ten and a half years ago, the now-retired Book Editor of the Boston Globe took a chance and asked a tennis adversary to write a review of Bob Kaiser's RFK Must Die ... on XII/13/70 we both won: this writer's first serve was published: an ace ...(it's still pertinent)

Reviewer Asks: Who Murdered RFK ?

The title is a direct quote from the scribblings Sirhan Sirhan made... the author's theme of the why's and wherefore's of these scribblings takes the reader into some fascinating aspects of the occult which are recounted in lucid prose coupled with a flair for the dramatic which gives pace and zest to the telling .....
To those who are ready to stick with Kaiser through the thick of his solution to Sirhan's "self-programming" and the thin of the psychiatrists' courtroom gyrations, this is a masterfully told tale of fact, fancy and a large slice of the truth. Every bit of the writer's prodigious energy was directed to solving the mental aspect of the puzzle. He missed the physical solution which to this reviewer is established on pp 109-110. Had Kaiser carefully examined the flightpaths of the three bullets which penetrated Kennedy's body he could possibly have lent an air of reality to the trial ....
The cause of death was the shattering of a bullet which entered the right mastoid scattering bits of steel and bone in front of its right to left and upward path into the brain. Later police tests confirmed the Coroner's estimate evidenced by powder burns on the right ear that the gun had been fired not more than three inches from Kennedy's head. (The next time you shake hands with someone, pretend you are shooting him behind his right ear with your pistol aimed at his left ear and you'll understand why Sirhan did not murder RFK) ....
If Kaiser, the writer-investigator, whose competence and ability show so clearly in his book, had started at the beginning as an investigative-writer, instaed of assuming with the judge, the prosecution and the defense that Sirhan was the murderer, he would have discovered the whole "Sirhan story": the patsy programmed to protect not himself but another Kennedy assassin, still at large .... (end of excerpts)

the question of Sirhan's part in the pantry ambush is the first question which should be addressed ... he himself cannot recall actually shooting the Senator as Kaiser's story of the unsuccessful attempts to unlock hypnosis vividly reveals...

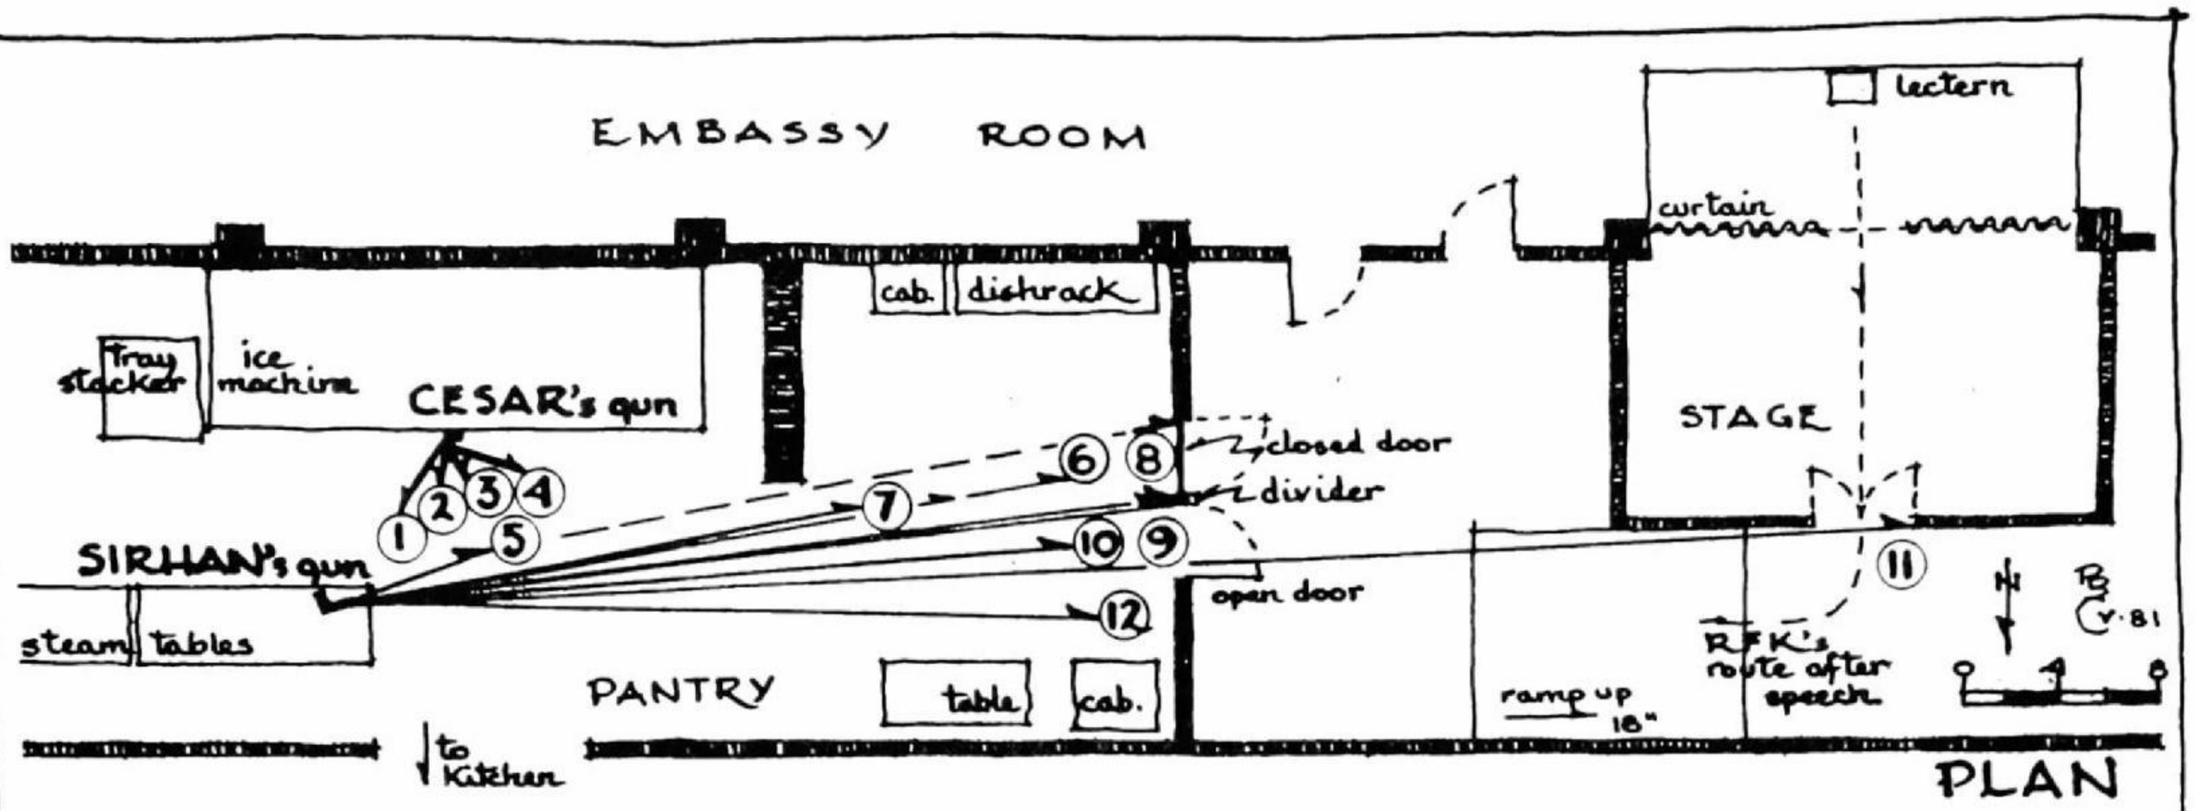
Editorial · NYTimes · IV·20·81

The Model Assassin

Even as President Reagan recovers from the attempt on his life comes a startling report from California. Sirhan Sirhan, who assassinated Robert Kennedy in June 1968 is scheduled for release in the summer of 1984, and then on to asylum in Libya. How come so soon? He has been, says a prison official, "a model prisoner" and the parole agency is determined to treat him like any other murderer. What a false sense of fairness. What a disservice to the country.

now comes the New York Times: "Sirhan, Sirhan who assassinated Robert Kennedy .... " knowing full well that this news is unfit to print, the deceit is a disservice to the newspaper, its editors and the world .... coverup of the facts of this murder has successfully bamboozled the public too long ... Allard Lowenstein's death was a major loss ... he came so close to having the case re-opened...

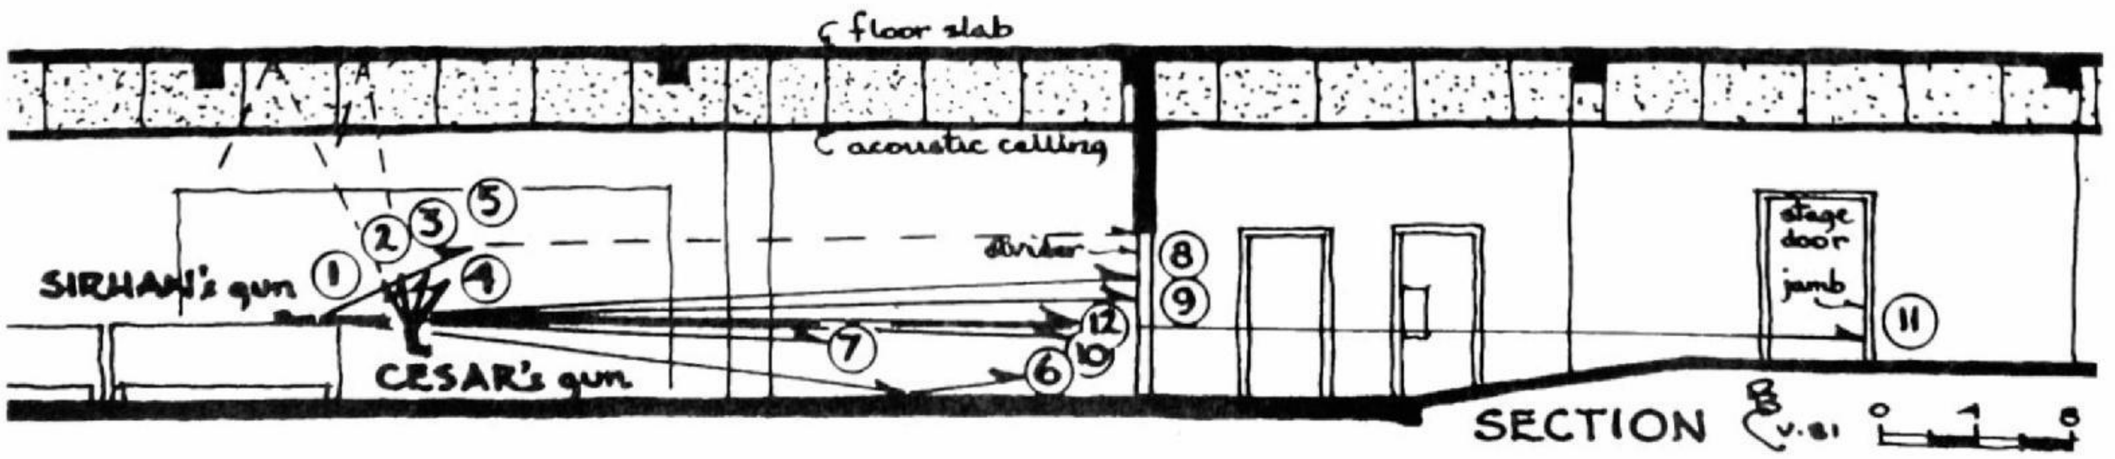
GKG·3·VI/81



diagrams are complex : to anyone who can depict time, motion, 2guns, 12 bullets, 4 men & 1 woman wounded, 1 Candidate murdered plus bedlam in one two-dimensional sketch : Salut

PLAN : after his Embassy Room speech RFK left the lectern, upper right, thru the stage, turned right and was led down ramp into pantry ..... SBS, Sirhan Bishara Sirhan, started shooting and TEC, thane Eugene Cesar used the confusion as cover for murder.... his 4 shots were at close range from behind the Candidate .... SBS's 8 shots were fired from in front of the Candidate and wounded people behind him .... this diagrammed truth was printed in the LA Free Press V·23·69 and reprinted in TCI's granddaddy, Penn Jones' Midlothian Mirror X·2·69 .... in preparation of a third exposé, in '75, this firing sequence was furnished, long-distance tel, by the late, prominent JFK researcher Lillian Castellano ... it was she who measured up the scene with F Nelson & J Shirley and found bullet holes The police could not allow : an 8-shooter shoots 8 bullets : period ....

SECTION : pardon the slip of the pen for bullet #2 : it stayed above the ceiling... TEC's 4 back-to-front-and-upward shots explain why the autopsy report is currently unavailable (see page 7).... SBS was slammed onto the steam table making horizontal flightpaths for 7 of his 8 bullets, 3 of them creating the police department's non-holes ....



GKG-4-VI/81

Ed Berkeley gave the 2-gun/12-shot solution its third showing in the IX/75 issue of People and the Pursuit of Truth ... today it is more than an embarassment to the President of the United States ... he is in need of persuasion (and help) to right this monstrous wrong .....

bullet	from	hit	wound and notes
# 1.	TEC	RFK	no wound: bullet passes thru jacket's shoulder pad, back to front, upwrad thru ceiling tile, ricochets off concrete slab back thru ceiling tile and scars north wall
# 2.	TEC	RFK	through-wound: right arm-pit to upper chest (right), track: back to front, upward thru ceiling tile, lost in ceiling space
# 3.	TEC	RFK	almost same right arm-pit wound: track: back to front, upward to lodge next to 6th cervical vertebra; 37.3 gr bullet recovered
# 4.	TEC	RFK	right mastoid: fired from range of less than 2", track: back to front, upward into cerebellum

this bullet caused GUNSHOT WOUND No. 1 (FATAL GUNSHOT WOUND) noted in Los Angeles County Coroner Thomas Noguchi's autopsy report, excerpts of which are included on page 7

# 5.	SBS	Paul Shrade	coursed top of head and continued on to hit underside of door frame header
# 6.	SBS	Irwin Stroll	left leg: bullet ricochets off floor thru Goldstein's trouser leg (no wound) before wounding Stroll
# 7.	SBS	Ira Goldstein	left thigh: 37.3 gr bullet recovered
# 8.	SBS	door-post divider	hole about 60" off floor
# 9.	SBS	door- post divider	hole about 55" off floor
		Los Angeles Police Dept does not admit recovery of either of these two bullets ... same for # 11	
#10.	SBS	Elizabeth Evans	forehead, along top of head, as she bent over to retrieve her shoe; one fragment remains in her head, 30.3 gr fragment recovered
#11.	SBS	stage door frame, jamb	hole about 16" off floor
#12.	SBS	William Weisel	leftside abdomen: 37.3 gr bullet recovered (which does not match bullet # 3)

MIRABILE DICTU !
when Noguchi found it impossible to track bullet #2's through-wound he extended RFK's right arm (see page 6) and tracked thru to exit... in 1963,
when Humes (JFK autopsy chief) found it impossible to track (wounding) bullet #2's Back Wound, he concluded the bullet had fallen out during cardiac massage in Dallas ... had he positioned the President with elbows "flying", see Z-225, this wound's hit-frame, any probe, other than a finger, would have tracked thru to the spine .... this simple physical hinderance would have rendered Senator Specter's Single-Bullet Theory both impossible and inconceivable ....

GKG·5·VI·81

TEC, one of many security guards hired by the hotel That night follows close behind the Candidate into the pantry .... firing four shots in concert with bedlam of SBS's eight, TEC's 4th bullet fatally wounds RFK as assassin and victim both stagger backward and fall to the floor.... the murder weapon was sold, then stolen ... its trail vanishes near Chicago....

V·81

Ambassador's Pantry,
Los Angeles, 5 June 1968
ØØ13

Carl Uecker, the Maître d', leads the Candidate by the hand thru the pantry where many of the staff wish him well .... suddenly someone standing on the tray-stacker, next to a girl in a polka-dot dress, lunges forward, around Uecker and instead of shaking hands starts shooting .... the Maître d' throws a hammerlock on this horror and slams it onto a steam table as its gun is emptied.....
spotting Conspiracy & exposing it and Coverup is ducksoup in The Pantry

GKG·6·VI/81

[Autopsy Report
Dr Thomas Noguchi
VI·6·68]

FINAL SUMMARY

GUNSHOT WOUND NO. 1 (FATAL GUNSHOT WOUND)

ENTRY: Right mastoid region.

COURSE: Skin of right mastoid region, right mastoid, petrous portion of right temporal bone, right temporal lobe, and right hemisphere of cerebellum.

EXIT: None.

DIRECTION: Right to left, slightly to front, upward.

BULLET RECOVERY: Fragments (see text).

[page 40
(emphasis added)]

With the test weapon at an angle of 15 degrees upward and 30 degrees forward (to correspond with goniometric data) and at a distance of one inch (2.5 cm) from the edge of the right "ear," the test pattern is most similar to the powder residue pattern noted on the Senator's right ear and on hair specimens studied. Similarity persists, on the 2 inch (5 cm) distance firing, with respect to the distribution of discrete powder granules.

Gentle Reader, you will be allowed to read this report in 2019 AD... admitted as evidence at Sirhan's trial it was buried in Sacramento, CA by Governor Reagan's administration (1969): "national security", of course... it was DEFENSE Counsel who interrupted the doctor's reading his report to the jury... it was DEFENSE Counsel who objected To the gorey details, The physical evidence which proved the DEFENDANT's innocence beyond any and all shadow of reasonable and unreasonable doubt.... see page 6....

SBS, the DEFENDANT, never closer than FOUR FEET in front of, to the left of his target.... Noguchi reported the fatal shot fired from less than TWO INCHES from the right mastoid.... TEC, not SBS, murdered RFK....

Cover up, a stunning success in Dallas, a near-goof in Memphis, came Thru handsomely in LA thanks to the DA, Evelle Younger, the LAPD Lieutenant, Robert Houghton, The FBI and The Governor....

CKG·7·VI/81

(continued from pg 2) ...duck soup simple .... thanks to Coroner Noguchi's autopsy report. I'd love to see Quincy take this one on! Sometime soon, get a copy of Jack Kimbrough's, The Killing of Robert Kennedy, and read Noguchi's grand jury testimony. This excerpt is on page 28:

> Q. ...do you have an opinion as to the maximum distance the gun could have been from the Senator and still have left powder burns?
>
> A. .... Allowing a variation, I don't think it will be more than two or three inches from the edge of the right ear.

Then go to Chapter Twelve, (among others), of The Assassination of Robert F. Kennedy, by William Turner and Jonn Christian. With these added pieces see what you puzzle together. We think further that the appalling attempts to discredit Noguchi, which were fought to defeat in court, only add credibility to his testimony and to the, programmed-patsy + second-gun-hidden-by-confusion = lone-nut-assassination-scenario formula that worked so well again. "How long, oh Lord, how long?" Accepting the proverbial value of an illustration, try the following as "art" imitating the official version of "reality" ...
